TECHNOLOGICAL FORECASTING AND SOCIAL CHANGE 43, 389(1993)

Author Index—Volume 43

Abara, I.O.C., 289
Alston, J.M., 301

Bonnieux, F., 369
Brown, H.S., 125

Caswell, M.F., 321
Coates, J.F., 91, 99, 205

Dathe, J.M., 47
Dijkstra, T.K., 201
Dinar, A., 211

Esposito, E., 1
Evenson, R.E., 337

Fauconneau, B., 369
Fauré, A., 369
Feder, G., 215

Garrison, W.L., 103
Gifford, J.L., 103
Gloaguen, Y., 369
Golden, J.E., 75

Heisey, P.W., 353
Herbig, P., 75
Himmelberger, J.J., 125
Horbulyk, T.M., 259
Howland, M., 185

Le Bail, P.–Y., 369

Maisse, G., 369
Martino, J.P., 169
Maruyama, M., 197
Modis, T., 157
Mohapatra, P.K.J., 19

Pardey, P.G., 301
Parker, D.D., 271
Peterson, H.J.S., 177
Plant, R.E., 241
Postlewait, A., 271
Prunet, P., 369

Rainelli, P., 369

Saha, B.K., 19
Shoemaker, R.A., 321
Singh, S., 289
Smale, M., 353
Søgaard, V., 201
Styhr Petersen, H.J., 177
Szejnwald Brown, H., 125

Umali, D.L., 215

White, A.L., 125

Zhang, W.–B., 63
Zilberman, D., 271

TECHNOLOGICAL FORECASTING AND SOCIAL CHANGE 43, 390–392 (1993)

Subject Index—Volume 43

Academic communities, 206
Acceptance strategies, developing, 47
Aggregate diffusion process, agricultural innovations and, 215
Agriculture
  biological–genetic technology in, 337
  biotechnology and technology transfer in, 271
  expert systems and, 241
  innovations and, 215
  intellectual property rights and technological innovation in, 259
  market distortions and technological progress in, 301
  seed–fertilizer adoption decisions and, 353
  technology adoption in, 289, 321
Aircraft, commercial transport, 1
Airline industry, suicidality of, 91
Airports, air transportation system and, 103
Aquaculture, biotechnology and, 369
Arizona, retirement communities in, 205
Autoregressive model, two-parameter, 203

Bayesian updates, using precursor events, 169
Biases, technology adoption and, 289
Biological–genetic technology, agriculture and, 337
Biological resource management, expert systems and, 241
Biotechnology
  agriculture and, 271
  aquaculture and, 369

California, innovative hot spots and, 75
Canada, plant breeders' rights and, 259
Capital, dynamic interactional relationships between knowledge and, 63
Coal gas, succession of technologies and, 177
Communities, rural, 205, 289
Company performance, employee skill and, 19
Competition, between technologies, 177
Composite measurement and procedure, identifying technological changes, 1
Computer industry, technological substitutions and, 157
Cooking, succession of technologies and, 177
Crop management, expert systems and, 241

Data entry, spatial restructuring and, 185
Demand management, air transportation system and, 103
Demand structure analysis, developing acceptance strategies based on, 47
Denmark, succession of technologies and, 177
Description, versus prediction, 201
Developing countries, hazardous manufacturing facilities and, 125
Development–environment interactions, export of hazardous technologies and, 125
Diffusion patterns, agricultural innovations and, 215
Du Pont, hazardous manufacturing facilities and, 125

Electricity, succession of technologies and, 177
Employee skill, company performance and, 19
Enterpreneurial towns, 206
Environmental concerns
  corporate, 125
  expert systems and, 241
  hazardous manufacturing facilities and, 125
Ethics, technology adoption and, 289
European Economic Community, trout farming in, 369
Expert systems, in agricultural and resource management, 241
Explanation, versus prediction, 201
Exponential curve, two-parameter, 203
Exurban towns, 206

Farm sector, technological change and, 289
Federal Aviation Administration, airline industry and, 91
Fisher–Pry model, for technological transitions, 157
Fixed, heterogeneous asset, 321
Florida, retirement communities in, 205
France, trout farming in, 369
Functional discovery, air transportation system and, 103
Functional equivalency, hazardous manufacturing facilities and, 125
Functional refinements, air transportation system and, 103

Geographic information systems, expert systems and, 241
Goodness-of-fit, reliance on measures of, 203

Government centers, 206
Green Revolution technology diffusion cycle, 215
Growth hormones, recombinant, 369

Hazardous technologies, export of, 125
Health management responsibilities, hazardous manufacturing facilities and, 125
Hidden tradeoffs, hazardous manufacturing facilities and, 125
Higher-skilled labor,spatial restructuring and, 185
High-yielding variety adoption, 353
Host countries, hazardous manufacturing facilities and, 125
Hot spots, innovative, 75
Hot water, succession of technologies and, 177
House heating, succession of technologies and, 177
Hybrid maize adoption, in Malawi, 353

Imaging technologies, spatial restructuring and, 185
Incremental improvements, air transportation system and, 103
India
  hazardous manufacturing facilities and, 125
  rice productivity and, 339
  TV industry and, 19
Industrial sector, taxes and, 63
Innovative hot spots, maintaining, 75
Intellectual property rights, in agriculture, 259
Interest rate, two-sector growth model and, 63
International business, new management dimensions and, 197

Joint ventures, hazardous manufacturing facilities and, 125

Knowledge, dynamic interactional relationships between capital and, 63

Lag time, probability distributions of, 169
Local trade centers, 205
Locational differences, in adoption rates, 215

Malawi, hybrid maize in, 353
Management, international business and, 197
Market distortions, agriculture and, 301
Market equilibrium impacts, agricultural technology adoption and, 321
Massachussetts, innovative hot spots in, 75
Meat production, 369
Micro-adoption, agricultural innovations and, 215
Milk yields, 369
Mindless extrapolation, 203
Multiattribute phenomenon, new product diffusion as, 19
Multinational corporations, hazardous manufacturing facilities and, 125

New technology product, policy analysis for growth of, 19
Nonphysical technology, agriculture and, 289
North Carolina, innovative hot spots in, 75

Occidental Chemical, hazardous manufacturing facilities and, 125
Oil feedstocks, succession of technologies and, 177

Partial equilibrium analysis, biotechnology and, 369
Physical technology, agriculture and, 289
Plant breeders' rights, 259, 338
Policy analysis, for growth of new technology product, 19
Polynomial trend models, 203
Population growth, 203
Precursor events, Bayesian updates and, 169
Predictive models, difficulties of, 201
Price, two-sector growth model and, 63
Processing industry, spatial restructuring and, 185
Production sectors, taxes and, 63
Products, succession of technologies and, 177

R & D
  agriculture and, 259, 301
  biological–genetic technology and, 337
Recreation communities, 206
Research Triangle, as innovative hot spot, 75
Resource management, expert systems and, 241
Retirement communities, in United States, 205
Rice, agricultural technology and, 337
Route 128, as innovative hot spot, 75
Rural areas, in United States, 185, 205, 289

Seed–fertilizer adoption decisions, simultaneous estimation of, 353
Service sector, taxes and, 63
Short-term optimizers,airline industry and, 91
Silicon Gulch, as innovative hot spot, 75

Silicon Valley, as innovative hot spot, 75
Small-farm argument, Bayesian updates and, 169
Software compatibility, technological substitutions and, 157
Somatotropin, bovine, 369
Spatial restructuring, technological change and, 185
Subjective judgement, of potential users, 47
Succession, of technologies, 177
Sunbelt, retirement communities in, 205
Sustainable development, hazardous manufacturing facilities and, 125

Taxes, production sectors and, 63
Technological change, spatial restructuring and, 185
Technological innovation, agriculture and, 259, 301
Technological innovation measurement, composite approach, 1
Technological substitutions, in computer industry, 157
Technology adoption
  agriculture and, 289, 321
  ethics and biases in, 289
  market equilibrium impacts and, 321
Technology transfer, agriculture and, 271
Telecommunications, spatial restructuring and, 185
Television industry, India and, 19
Texas, innovative hot spots in, 75
Thailand, hazardous manufacturing facilities in, 125
Town gas, succession of technologies and, 177
Trout farming, growth hormones and, 369
Two-sector growth model, dynamic interactional relationships and, 63

United States
  agriculture and, 289
  airline industry and, 91
  innovative hot spots and, 75
  rural, 185, 205
  spatial restructuring and, 185
University, financial suuport and, 63
Urban-anchored firms, spatial restructuring and, 185

Wage rate, two-sector growth model and, 63

Xerox, hazardous manufacturing facilities and, 125
